## OUR MOÖN BLACK COSMIC ON CHARLES MARTINS WRIST

Charles Martins, better known as Mathieu in Emily in Paris - the number one series on Netflix - is wearing one of Le Rhône's creation: the Moön black cosmic.

Emily is a young woman from Chicago, working in a marketing company that suddenly sends her to Paris after having acquired a French luxurious advertising firm. She will dive into the beauty of the city, experience quite a cultural shock and fall off slowly into a messy love life. Will a certain Mathieu wearing a le Rhône watch try to flirt with Emily?

French actor Charles Martins and Le Rhône share a common past. Shortly after its creation in 2013, Le Rhône chose Charles for its first campaign - a shooting that took place at the iconic Place Vendôme. Charles showcased our first Rôad Racer models with his natural elegance and charm.

A few years later, we found Charles strolling around the most famous streets of Paris, a Le Rhône watch on his wrist, this time at the forefront of the international scene!

## MOÖN BLACK COSMIC

The Moön collection is featured with the 41mm rose gold, black cosmic dial which reveals a starry sky and a hammered moon with more masculine accents than the aventurine version.

An exclusive in-house Grande Phase de Lune complication comes to light with the contrasts of the black cosmic dial rotating on the top of the moon. This disk is crafted in silver texturized and surrounded by a SuperLuminova star studded sky.
